Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	06-april-2026
Team ID	SWTID-2026-2633
Project Name	AUTOMATING IMPORT DATA AND RELATIONSHIP MAPPING USING IMPORT SETS AND DOT WALKING
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR NO	Requirement	Description
FR-1	Data Import	System must import data from CSV, Excel, JSON, XML, APIs, and databases
FR-2	Scheduled Imports	Support both scheduled and manual (on-demand) imports
FR-3	Data Validation	Validate data before processing (format, type, mandatory fields)
FR-4	Import Set Creation	Automatically create and manage import set (staging) tables
FR-5	Field Mapping	Map source fields to target fields using configurable mappings
FR-6	Transform Maps	Support transform maps with field-level and scripted transformations

Non-Functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Provide intuitive UI for non-technical users
NFR-2	Security	Implement role-based access control (RBAC)
NFR-3	Reliability	Ensure system continues operation during failures.
NFR-4	Performance	Separate import, mapping, and transformation logic
NFR-5	Availability	Support uninterrupted scheduled jobs
NFR-6	Scalability	Support increasing data volume and concurrent jobs
