Ideation Phase

Brainstorm & Idea Prioritization Template

Date	06-April-2026
Team ID	SWTID-2026-2633
Project Name	Automating data import and relationship mapping using import sets and dot walking
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template

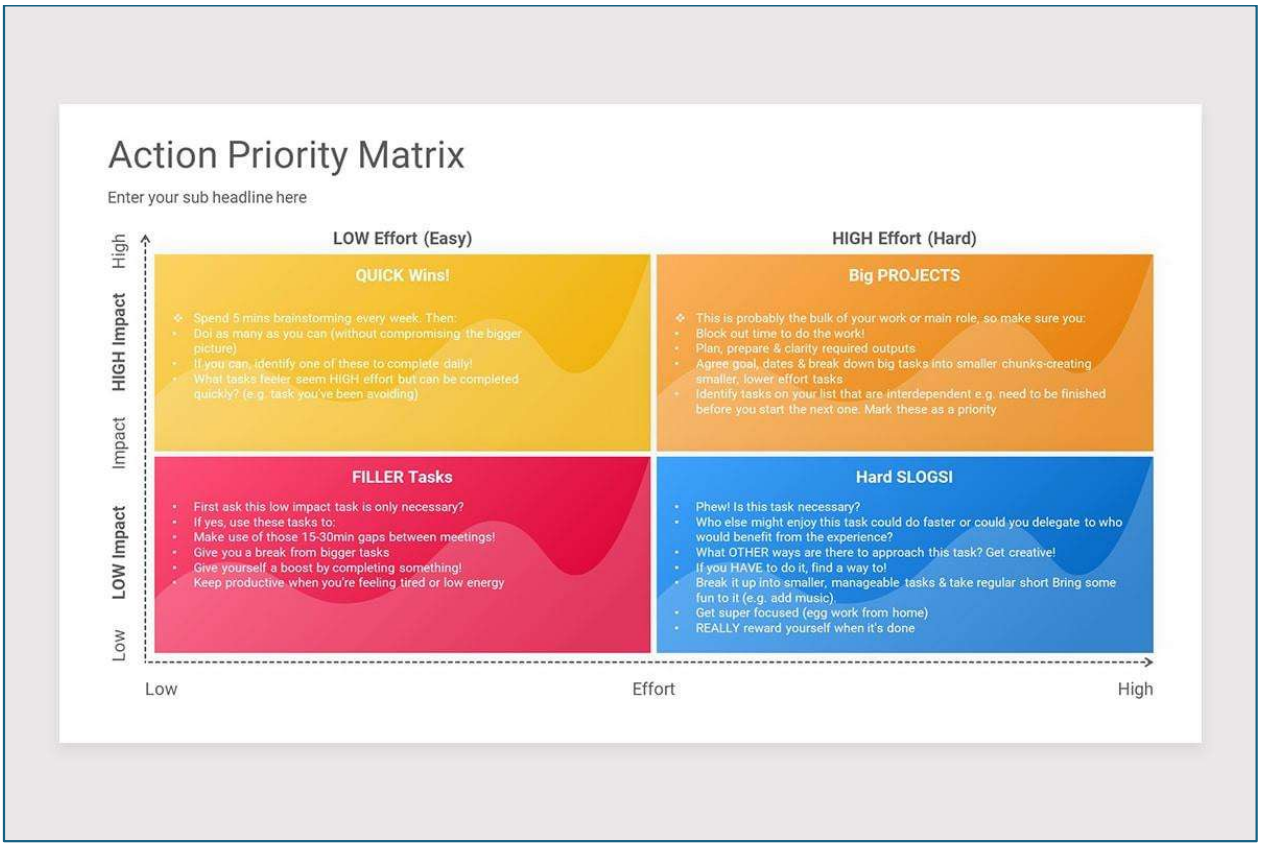
A Brainstorm & Idea Prioritization Template is a structured framework used during the ideation phase of a project to systematically capture, organize, evaluate, and rank ideas based on predefined criteria such as impact, feasibility, scalability, and risk.

Key Points:

- Encourages free-flowing, out-of-the-box thinking
- Focuses on quantity of ideas before quality
- Builds on others' ideas to create innovative solutions
- Avoids criticism during the idea generation phase

Step-1: Team Gathering, Collaboration, and Problem Statement Selection

Step-2: Brainstorm, Idea Listing and Grouping

Step-3: Idea Prioritization


Idea Prioritization is the process of evaluating and ranking generated ideas based on specific criteria such as impact, feasibility, scalability, and risk to identify the most effective solutions for implementation.
