Ideation Phase
Define the Problem Statements

Customer Problem Statement Template:

A customer problem statement is a clear, concise description of a specific problem or pain point that a customer is experiencing, which your product or service aims to solve. It focuses on the customer's needs, not your solution. This kind of statement is essential in design thinking, product development, and marketing because it keeps the focus on the customer rather than the solution.

Example:

"Small business owners struggle to manage inventory efficiently because manual tracking is time-consuming, making it hard for them to keep up with demand and avoid stockouts."
